

# SYMMETRY™ HOMELAND v7.0

The Symmetry Homeland version of Security Management Software is designed to provide powerful integrated access control and security management solutions for those users taking advantage of Federal smart card standards such as FIPS 201, CAC, TWIC and FRAC.

Symmetry Homeland comes in various versions sized to meet the needs of virtually any organization. Symmetry Homeland Professional is for medium-sized organizations requiring a client/server security management system that can use existing LAN/WAN networks.

Symmetry Homeland Enterprise uses the powerful Microsoft® SQL Server database, which meets the requirements of high performance and scalability for systems handling large amounts of data. Symmetry Homeland Global is designed for organizations spread over a number of geographically dispersed sites, and allows each site to maintain autonomous operation and responsibility for its own security systems, while obtaining benefits from centralized administration, card management and alarm handling.

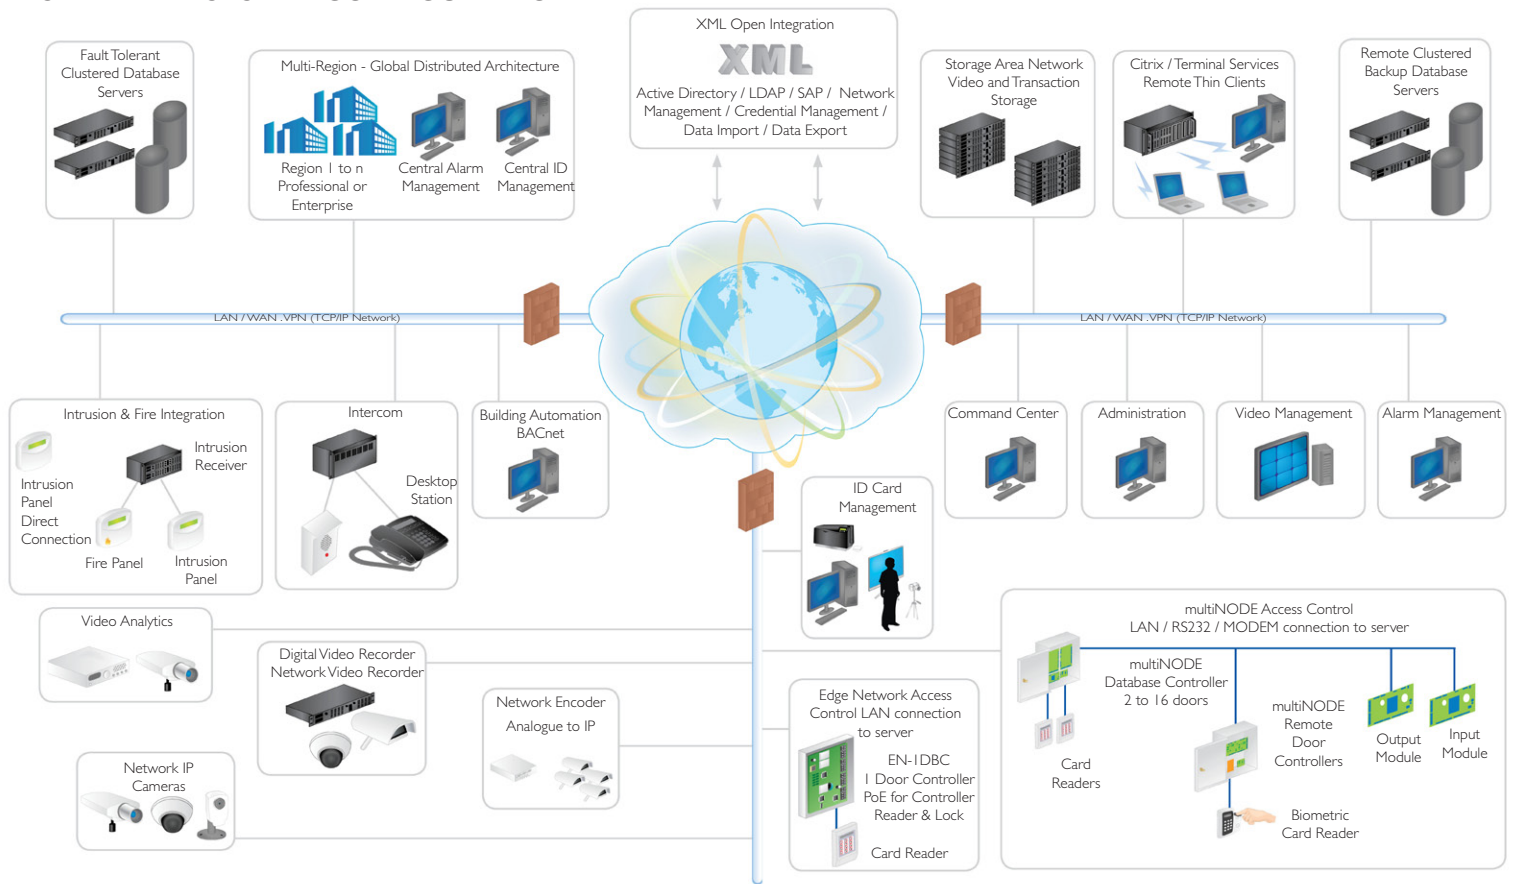

Symmetry Homeland is tailored to support the various fields of the CHUID. Symmetry Homeland provides a comprehensive range of standard features, including alarm monitoring and routing, visitor management, badging and graphical map interfaces, database partitioning for multiple disparate users groups, and additional options available to meet special requirements. Client access is also available using thin client architecture.

The system provides support for a variety of card readers including AMAG smart card readers and third-party readers with Wiegand output.

## KEY FEATURES

- Single-server Access Control and Security Management System scalable to multiple servers
- Competitively priced to support installations from medium to very large
- Unrestricted number of client PCs, card readers and card holders
- Uses Microsoft SQL Server Database technology
- Employs the very latest thinking in user interface design
- Fully LAN and WAN compatible using minimal bandwidth
- Compatible with mobile tablet PCs communicating over a wireless network
- Supports redundant clustered servers “hot standby fail-over”
- Video Badging and Visitor Management software as standard
- Comprehensive alarm handling features
- Threat Level Manager module available
- Provides options to control video systems, digital video recorders, intercom systems, alarm panels, and more
- New Workflow Designer module available
- Open architecture with various integration options

**SYMMETRY SYSTEM CONFIGURATION**

**PURCHASING INFORMATION**

**SYMMETRY Professional  
Homeland Security Edition Software**

- PRO/32-V6.2-HSE
- PRO/64-V6.2-HSE
- PRO/128-V6.2-HSE
- PRO/256-V6.2-HSE
- PRO/512-V6.2-HSE
- PRO/CLIENT-V6.2-HSE

**SYMMETRY Enterprise  
Homeland Security Edition Software**

- ENT-PLAT-V7.0-HSE Platform Software
- ENT-LIC-xxx-V7.0 Card Reader Licenses (xxx = 128, 256, 512, 1024, 2048)
- VID-CAM-xxx-V7.0 Camera Licenses (xxx=004, 008, 016, 032, 064, 128)
- ENT/CLIENT-V7.0 Client PC Software

**SYMMETRY Enterprise  
Homeland Security Edition CLUSTER-AWARE Software**

- ENT-PLAT-CA-HSE Cluster Aware Software

**OPTIONAL MANAGEMENT SOFTWARE**

Software packages offer a range of fully-integrated additional features designed to enhance the system and provide higher levels of flexibility and integration. Optional features include:

- Symmetry Video Management
- Workflow Designer
- Threat Level Manager
- Intrusion Interface Module
- Web Access
- XML Open Integration Module
- Building Control Module
- Intercom Management
- Guard Patrol Management
- Muster Management (Safety Roll Call)
- Data Connect Import/Export
