

**Hawkeye Mobile** gives you the power of an AMAG Symmetry™ Client on a handheld device. The built-in card reader on a DAP 3240 handheld can read HID Proximity cards, contact or contactless smart cards, PIV and 1D or 2D bar codes. Full support for Symmetry Online Muster including mobile card reader and mobile Muster listing displayed on the mobile screen..

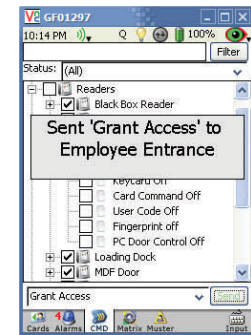

### Card Holders

- Verify cards using an attached Prox or Smart Card reader or search the card holder database using the mobile keypad
- Send card reads back to the SMS Server for reporting
- Mitigate concerns of reproduced fraudulent cards
- Modify, activate/inactivate, delete cards and manage access rights
- Enroll cards with an integrated digital camera

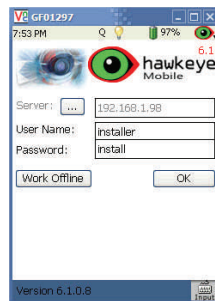

### Alarms

- Notification of new alarms with a sound alert
- Acknowledge and clear outstanding alarms
- Interactive with Symmetry clients

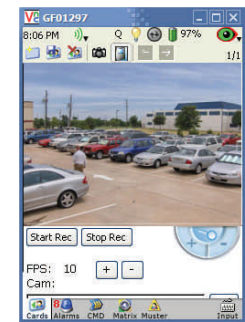

### Control

- Perform the functions of the SMS Command Center
- View hardware status
- Send commands to card readers and auxiliary outputs
- Enable/Disable monitor points

### Off Line Mode

- Card Holder Verification functions using the local hand held database when there is no network connectivity available

### Video

- View live video on IP cameras
- Control Pan/Tilt/Zoom with the touch screen

### Designed to work with DAP Technologies' CE3240BW Handheld Computer

- Fully rugged (IP65, MIL-STD-810F); FIPS-201 certified; listed on the TSA's approved list
- Top Cap and Back Pack allow for customization for each customer's requirements
- Custom configurations including Wireless (Wi-Fi, WWAN), Smart Card Reader, Fingerprint Sensor, Digital Camera, 1D/2D Barcode Imager, OCR, and HID Proximity Reader
