

SYMMETRY™ ADVANCED REPORTING

The Symmetry Advanced Reporting module provides users with the ability to generate powerful custom reports. This free of charge add on Symmetry module has been specifically designed to support the creation of tailored reports for information such as employee information, alarms, system status or access control event data.

Symmetry Advanced Reporting uses a sophisticated Data Dictionary which compiles multiple database views to simplify report creation. Customized reports can then be stored on the network alongside an included library of standard reports for users to access. Collate data such as employee activity, alarms, system status or event data to measure and analyze by exporting it into various formats including Excel spreadsheets, PDF format or by email.

The integrated design tool enables users to customize the look of reports through inclusion of company logos as well as change colors and layouts for a corporate look and reporting standardization. Whether using standard reports from the library or creating something custom the data can be displayed in a variety of formats including graphs and charts.

A comprehensive help functionality is available within Symmetry Advanced Reporting to support users designing their own reports. Alongside the help functionality sits an extensive library of step by step training videos to aid users in report creation.

Symmetry Advanced Reporting is a comprehensive tool, available as an add-on from Symmetry V8.0.2 onwards and can run on any PC with a connection to the Symmetry database.

Reports can be written by either the Symmetry users themselves, the Symmetry Authorized Certified Reseller or by AMAG Technology. AMAG Professional Services provide a report writing service. For more information contact proservices@amag.com.

Symmetry Advanced Reporting encompasses a sophisticated audit capability designed to meet compliance requirements for regulated industries such as NERC CIP for the electric power industry.

KEY FEATURES

- Report design tool
- Create unlimited reports from Symmetry database
- Advanced audit report capability
- Extensive help functionality
- Training video library
- Sample reports provided
- Runs on any PC with Symmetry database connection
- Export reports in MS Excel, PDF's or email
