

Symmetry CompleteView

Video Management for Everyone

KEY FEATURES

Integrated Solution:

- Integrated with Symmetry Access Control and Symmetry Control Room.
- Fast integration setup with bulk camera import.
- Display live and recorded video events from Symmetry and Control Room clients
- Quickly search tagged video recordings (e.g. door alarm events).

Supporting Hardware:

- Full range of Symmetry PowerProtect Servers available, pre-installed with Symmetry CompleteView.
- Integrated Video Servers, with pre-installed software and CompleteView video licenses are also available.
- GuardStation Video Client Workstations are available with the CompleteView client software pre-loaded.
- The CompleteView Design Tool Wizard is available to assist consultants and system designers with video hardware selection.

Symmetry CompleteView is AMAG Technology's simple, scalable and secure video management platform, providing a scalable solution that is also easy to use.

Symmetry CompleteView is provided in three separate editions (ONE, Professional and Enterprise), and each CompleteView System may include one or more recording servers, management servers and client access via desktop (thick client), web client and mobile applications.

The newly designed Symmetry CompleteView User Interface provides a consistent experience, allowing users to easily navigate through the solution, regardless of whether they are using the desktop UI, web client or mobile application.

CompleteView supports analog, IP and video hybrid designs, while also providing for a seamless transition from legacy analog to IP camera support. CompleteView integrates with the leading IP camera manufacturers and analytics providers, transforming raw video into actionable intelligence.

Improved Camera Support: Onvif Profile S is supported, providing enhanced control for ONVIF Profile S conformant devices. H.265 is also supported for select cameras.

Graphical Maps: CompleteView includes GIS map support, providing aerial & satellite imagery by location. Maps automatically display in the Map Panel of Alarm View so it's clear to the operator where the camera is located in relation to the facility being monitored.

Localization: CompleteView supports non-English languages, and offers Localization options for the Desktop Client, Web Client and Video Player. Check with your local AMAG representative for supported languages.

AMAG Technology's Symmetry CompleteView Video Management System is a powerful, feature-rich video surveillance solution, available in three separate editions.
