AMAG TECHNOLOGY
An ALLIED UNIVERSAL Company

COMPANY FACT SHEET

Company Overview

AMAG Technology is a leading provider of access control, video management, and identity management solutions.

Established in 1971, the company has built a reputation for delivering innovative security technologies that help organizations protect their assets and ensure the safety of their people.

Key Offerings

Access Control Solutions

We offer comprehensive access control systems that enable organizations to manage and monitor access to their facilities. These solutions include access control software, hardware, and peripherals designed to meet the diverse needs of businesses across various industries.

Identity Management

We provide identity management solutions that streamline the process of credential issuance and authentication. These solutions help organizations establish secure identity protocols, ensuring that only authorized individuals gain access to sensitive areas.

Video Management Systems

Our video management solutions empower organizations to effectively monitor their premises through advanced video surveillance technology. These systems offer features such as real-time monitoring, video analytics, and integration with access control systems for enhanced security management.

Mobile Credentials

Our mobile credentials provide a more seamless and user-friendly experience for employees and visitors, as they don't need to carry cards or keys. As the technology evolves, organizations can take advantage of new security features and capabilities.

Visitor Management

Our visitor management systems eliminate manual paper logs, handwriting badges, or tracking down employees when their guest arrives. Visitor management allows companies to better protect employees, assets and buildings by providing a proper record of who enters buildings and reduces errors and inaccuracies through automated data entry.

Command & Control

With our Centralized Global System Management, companies can easily monitor and control all security applications and devices through one user interface, which allows for improved operator efficiency in the handling of alarms and events while providing faster response times and increased security.

Industry Focus

| Data Centers | Energy/ Utilities | Finance | Healthcare | Education | Government | Commercial Real Estate | Transportation |

Company Values

AMAG Technology is committed to innovation, reliability, and customer satisfaction. The company strives to develop cutting-edge security solutions that address evolving threats while providing exceptional support to its clients.

What Makes AMAG Technology Unique

Making our own products gives AMAG Technology the flexibility to customize design changes, incorporate unique features, and respond quickly to customer feedback. We are in control of our supply chain, reducing the risk of disruptions or dependencies on external suppliers.
