Symmetry™ CONNECT 2.0

- ⊘ **Streamlined Experience**
- ⊘ **Protect Identities**
- ⊘ **Mitigate Risk**
- ⊘ **Demonstrate Compliance**

Symmetry™ CONNECT 2.0 automates identity management to minimize redundancies, reduce mistakes, optimize internal operations and make time-consuming paperwork a thing of the past — significantly boosting responsiveness and security while lowering costs.
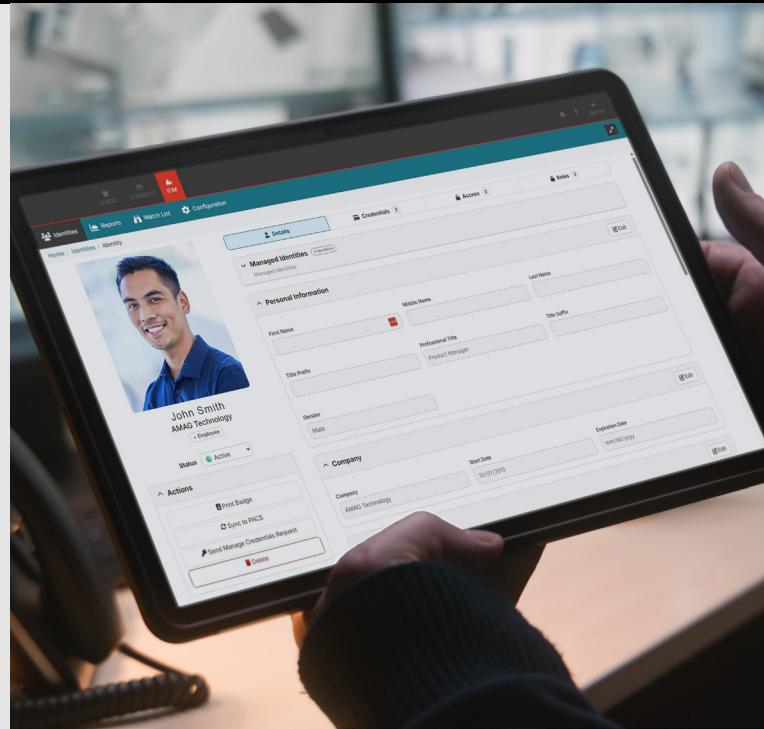

Onboarding and offboarding. Access-change requests. Policy enforcement. Audits and compliance. If your organization is spending too much time and money manually handling identity management tasks like these, Symmetry CONNECT is the solution.

Through its centralized identity database, Symmetry CONNECT coordinates between HR, IT, and Security departments. One unified dashboard vastly simplifies adding personnel, changing access or privileges, and other updates — while Symmetry's audit trail functions track every step.

The Old Way

Symmetry™ CONNECT

Managing identities for employees, contractors, vendors, and visitors used to involve multiple forms, emails, calls, and approvals, often dragging on for days or weeks. But with Symmetry CONNECT Identity Management, your organization can securely and consistently accomplish these tasks and more in minutes.
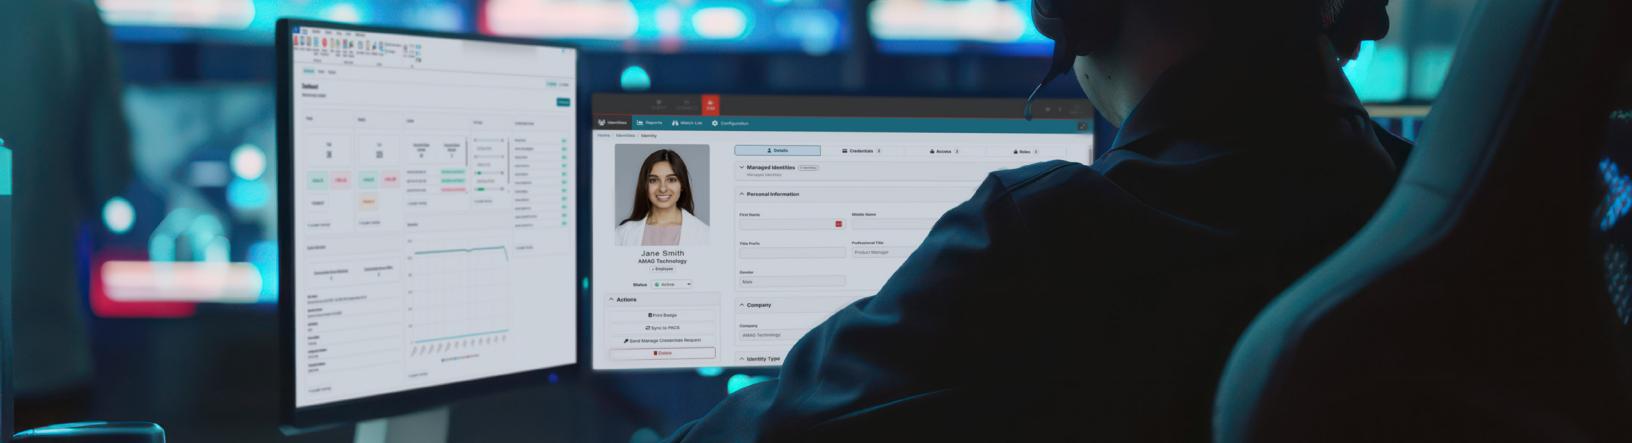

Onboarding and Offboarding

- Quickly set up accounts, grant appropriate access credentials, assign roles based on job requirements — and just as quickly update them as necessary.

- Dramatically reduce costs by streamlining on- and offboarding.

Centralized Policy Enforcement

- Automate policy enforcement, instantly responding to changes to maintain corporate policy as well as physical and data security.

- Ensure least privilege access is enforced by automatically removing access and credentials not required or used.

- Improve company security and policy adherence by instantly ensuring that only approved identities have access to secure areas per company policies.

Streamlined User Experience

- Update and manage all identity details on one screen, across all sites.

- Networked by SwiftConnect, allowing you to:
  - Centralize and manage credentials across a mix of access systems.
  - Keep existing systems; no rip and replace.

Self-Service Access Requests

- Provides real-time access management by instantly updating profiles and synchronizing identity changes with access control systems, ensuring only authorized individuals can access designated areas.

- Enable employees to request the access they need when they need it.

- Easily request new or replacement credentials.

Audit & Compliance

- Maintain compliance in regulated industries (financial services, electrical power, healthcare, oil and gas, etc.) with reporting that satisfies PCI, SOX, HIPAA, NERC CIP and other audit and compliance demands.

- Simplify complex reporting through a central source that shows who has access, when they have access, who approved it, and why.

- Make audits automatic: schedule audits based on needs and requirements, and automate recertification so you never fall out of compliance.

Join forces, unite for efficiency: choose Symmetry.
